

Böhler wins a movie award in the USA

Böhler Edelstahl was awarded the coveted bronze medal at the Economy movie festival in New York distinguishing themselves from the hundred other contenders.

The new Image Video from Böhler Edelstahl convinced the jury in New York. With impressive pictures accentuated with classic music by Edward Grieg and Rossini, the video shows the most beautiful sides of special steel. Böhler's long-time co-partner "Monte Video" from Linz with director Peter Felzmann is responsible for both the screenplay and the production of the 7-minute-long video. The video was made in the High Definition Format, the highest quality standard available today.
